

Organic Popcorn for You
It's GE Free = not genetically engineered

Monsanto engineers corn to tolerate Roundup herbicide or to produce Bt toxin in every cell - banned in France.

GE Free Zones:
worldwide + 4500 cities in Europe
+ Powell River, B.C.
How about here?

Food or Fuel?
Corn for ethanol biofuel makes more CO2 & more costly grains

5 RISKS OF GM FOOD:
Transfer of Allergens. Antibiotic-Resistant genes transfer to human cells. Toxicity: eg. Monsanto's Mon863 corn. Contamination: GM maize for animals in US tortillas. Corporate Control of food.

HOW NOT TO EAT GM FOOD:
Eat organic. Avoid corn & soy oil. 70% of processed food is GM. Check: gmoguide.greenpeace.ca

TERMINATOR SEEDS
are engineered to be sterile after harvest. The risks of cross-pollination and threat to food security and the Canadian government are promoting Monsanto and are promoting them. Ban Terminator Seeds! Go to: www.banterminator.org

Starlink Corn, unapproved for people, contaminated US foods - 300 products recalled in 2000.
NO herbicide inside corn
